Interested citizens (see attached sign-in sheet)

PLEDGE OF ALLEGIANCE

OPENING COMMENT/LEGISLATIVE PRAYER  Commissioner Wright

Public Meeting – Conceptual Site Plan & Parking Modification Acceptance: Renatus Office Building Addition 1312 W 75 N

Cassie Younger, Assistant Planner, reviewed the discussion from the May 23rd, 2018 Planning Commission meeting that led to the Conceptual Site Plan & Parking Modification Acceptance to be tabled. Staff had a chance to review new information presented at the last meeting, and believes that the Commission should accept the Conceptual Plan to amend the original Renatus Final Site Plan, including parking modifications and a shared parking agreement with the neighboring Bridge Community Church.

Chair Hayman asked how long a parking modification lasts. Cory Snyder, Community Development Director, said that the type of parking modification that the applicant requested is “user specific”, so that if the owner moved to a different building, the parking modification would no longer be in effect and future owners would need to determine how to handle parking requirements, or request their own "user specific" parking modification.
Commissioner Hintze asked Ms. Younger if there were any limitations of the study done by the applicant, as compared to a parking study done by a professional traffic engineering firm. Ms. Younger responded that she had compared the study that was presented by the applicant to other parking studies done by traffic engineers, and the results were nearly identical to others that had been submitted.

Commissioner Hirst asked if the Planning Commission is opening themselves up to liabilities by not performing a professional study with a traffic engineer. Mr. Snyder explained that the ordinance does not require a professional engineer to perform the study, but requires that the person performing the study check the ITE manual, which the applicant did.

Commissioner Johnson asked whether a parking study is required by ordinance to approve a parking modification and Mr. Snyder confirmed that it is.

Commissioner Wright voiced that she does not feel by accepting the applicant's traffic study, it means that every other non-professional parking study would need to be accepted. What it does mean is that future studies will still be required to meet the requirements of the ordinance, as the applicant did. Ms. Younger added that she feels the applicant's parking study is actually more transparent than some professional traffic engineers' studies.

Dan Holbrook, representative of the contractor building the new addition at the Renatus Office Building, commented that when he did the parking study he made sure that his study was based on the current standard of the industry. He said he was being as fair and blunt as he could and tried to take all potential parking remedies into account.

Commissioner Hirst made a motion that the Planning Commission accept the Conceptual Plan to amend the original Renatus Final Site Plan dated September 12, 2014, subject to conditions (1)-(4) below, with reasons for action (a)-(c). Commissioner Daly seconded the motion, which passed by unanimous vote (7-0).

Conditions:

1. The applicant shall submit a Final Site plan meeting the standards of CZC 12.21.110(e).
2. The applicant shall submit architectural elevation and construction plans that comply with the existing building and CZC 12.35.080, Exterior and Architectural Standards in Industrial Zones.
3. A user-specific parking modification for this particular use from the required parking in CZC shall be approved by the Planning Commission at Final Site Plan approval.
4. Screening or outdoor dumpster and trash receptacles meet the standards outlined in CZC 12.51.110.

Reasons for Action:

a) A complete conceptual site plan application has been submitted [Section 12.21.110(d)(1)]
b) A conceptual site plan is not intended to permit actual development of property, merely to represent how the property may be developed and does not create any vested rights to develop [Section 12.21.110(d)(5)].
c) Based on the submittal by the applicant, the Site Amendments have potential to meet the necessary zoning requirements, with modifications.
Public Hearing - Zoning Map Amendment – 698 W Porter Lane

Mr. Snyder presented the applicants petition to acquire the north portion of the subject property located at 698 West Porter Lane and add it to the west commercial property, known as Dave's Auto, for the purpose of expanding the business use and adding parking and another building/shop. The petitioner desired to have a portion of the residential property rezoned to Commercial High. Staff found that the proposed amendment is consistent with the goals, objectives and policies of the City's General Plan, is harmonious with the overall character of the existing development in the vicinity of the subject property, does not adversely affect adjacent properties, and has adequate facilities and services intended to serve the property. One consideration Mr. Snyder presented is that if the City is amenable to the rezone, the land has to be divided and the remnant parcel needs to be absorbed into the applicable business lot to the west, as is desired by the petitioner.

Commissioner Daly asked Mr. Snyder for the dimensions of the lots to be sure all lots would remain within the required minimum dimensions, and none would run the risk of not being able to be developed in future due to their nonconforming size. Mr. Snyder confirmed that all lots would remain within required minimum dimensions or be combined into another larger lot.

Chair Hayman asked where the property is going to be divided. David Bell, applicant, showed the Commissioners the line where the property will be divided on a Google Earth image displayed during the meeting.

Chair Hayman asked if the applicant has any concerns with the rezoning. The applicant said that he does not.

Chair Hayman opened a public hearing at 7:38 p.m. and closed the public hearing seeing that no one wished to comment.

Commissioner Helgesen made a motion for the Planning Commission to recommend approval of the Zone Map Amendment for a northerly portion of the Parcel 03-001-0005, located at 698 West Porter Lane, from Residential Medium (R-M) to Commercial High (C-H), subject to requirements (a) and (b) with reasons for the action (1)-(6) below. Commissioner Hirst seconded the motion.

Commissioner Daly requested an amendment to the motion that the Zone Map Amendment for a northerly portion of the Parcel 03-001-0005, located at 698 West Porter Lane, be rezoned from Residential Medium (R-M) to Commercial Very High (C-VH), instead of Commercial High (C-H). Commissioner Johnson seconded the motion. Chair Helgesen agreed to the amendment.

The Commissioners voted upon the amended motion, which passed by unanimous vote (7-0).

Requirements:

(a) Any rezone of the partial area cannot become effective until a division of land is approved by the City.

(b) A division of land cannot leave a remnant parcel, so such division of the subject tract, to be rezoned, would need to be absorbed into the applicable business lot to the west, as is desired by the petitioner.
Reasons for the Action:

1. The Planning Commission has sufficiently reviewed and considered the criteria found in Section CZC 12.21.080.e of the Zoning Ordinance.
2. The Planning Commission finds that the rezone is consistent with the goals of the General Plan, as described in the staff report and the Commission’s findings.
3. The Planning Commission finds that the large parcel, zoned R-M, east of the commercial area and the subject parcel area, appears to be an appropriate defining north/south limit line for expected low to medium residential use buffering Porter area policy expectations.
4. The Planning Commission finds that the R-M development expectation is, by policy, to be the commercial buffer use for the neighborhood. Therefore, rezoning the property to commercial would not adversely affect the multi-family development directly to the east.
5. The Planning Commission finds that the requirements of rezone are directly related to ensure that the rezone action complies with applicable zoning and subdivision regulations adopted by the City.
6. Therefore, the Planning Commission finds that the request for C-VH Zoning designation is appropriate.

Discussion – West Centerville Plan Summary and Update

Chair Hayman asked Mr. Snyder how many people were on the Oversight Committee for the West Centerville Neighborhood Plan Update of 2015/15. Mr. Snyder said he thought there were 10 people on the committee. These 10 peoples were made up of Planning Commissioners, a City Council member, a citizen and a City Council member from the West Bountiful community. Chair Hayman asked whether the West Centerville Neighborhood Plan Update of 2014/15 was something that the City Council had requested. Mr. Snyder said that it was initiated by the City Council and explained that it was supported politically, and partially driven by the desire to add a UTA transit stop on the West side, to keep transit stops out of the east side of the City. But there was resistance from the West Bountiful neighborhood, the transit stop was pulled from the proposal, and a landowner in West Centerville revealed that he had been planning to sell his land to Mercedes, and as such, the Plan was not passed. At the time the Plan was rejected, City Council members commented that they hoped to continue discussion of the West Centerville Neighborhood Plan, but it was hard to “re-ignite the movement.”

Commissioner Johnson said that he was on the Oversight Committee, and he felt that the West Centerville Neighborhood Plan was initially progressing well, but agreed with Mr. Snyder’s summation of why the West Centerville Neighborhood Plan did not pass. He said that he feels the City Council does not see multi-family uses as the best use of the area at this point, and so these should not be included in future West Centerville Neighborhood Plans.

Chair Hayman reviewed the Parrish-Legacy Mixed Use Preferred Scenario that was included in the packet. She said that the thing that struck her looking at the map is that the area is very built out at this point, compared to how it was during the original discussions of the West Centerville Plan. Commissioner Wright agreed and added that if the Commissioners try to plan for the West Centerville Neighborhood at this point, the Plan would need to be completely different.

Commissioner Hirst commented that the type of development that is to continue in West Centerville needs to be decided upon as part of a plan, or there will continue to be development
in the area that is not quite what the Commissioners may be hoping for. Mr. Snyder reviewed what is currently developed in the area.

Commissioner Hintze asked what the liabilities are of the multi-family housing that's been built in the West Centerville Neighborhood in terms of consequences to future planning in the area. Mr. Snyder said that isolating multi-family residential development creates lack of synergy in the area, and lack of synergy creates deterioration in the area. That is why it was important in the original West Centerville Neighborhood Plan to create a significant neighborhood around the multi-family housing. Mr. Snyder explained that if the multi-family housing had more than 100 units a professional property management company would manage the community which would improve the neighborhood. Commissioner Johnson commented that there was concern with increasing the density of the multi-family housing because the area is a high-crime area and traffic would be increased getting on and off I-15 in the area. Mr. Snyder clarified that studies had shown that the crime rate per unit was the same per unit in a neighborhood of single-family homes, and that an added interchange could be approved by UDOT if the density was higher in the area.

Commissioner Daly asked about the viability of an overpass at Porter Lane over the freeway, as had been mentioned in the report. Mr. Snyder said that it would be unlikely that UDOT would fund the project, but that it would fit if the money was there. He also mentioned there would be consequences on the east side particularly at Frontage Rd. and said that the single-point interchange with its tie-over to Frontage Lane would most likely be a higher priority than the fly-over at Porter Lane.

Commissioner Johnson said he would like to look at how to complement the existing uses in the area, and how to spur the redevelopment of the Trinity/Syro Steel site. He would also like to look at what helps the City, in terms of tax revenue.

Commissioner Hintze asked what the occupancy is of the current housing on the West side of Centerville. Mr. Snyder said the current multi-family housing is nearly 100% occupied. Commissioner Johnson reported that the rental rates are going up quarterly in that area. Commissioner Wright said it is important to keep in mind when thinking about this plan that specific amounts of affordable housing need to be offered in the area.

Chair Hintze asked if there is a plan for development west of Legacy. Commissioner Wright said that the area has wetlands and it is not a safe place to build. Mr. Snyder said that 2500 acres, many of which are west of Legacy, have been transferred to the Nature Conservancy.

Chair Hayman said she feels there is still some opportunity in West Centerville, but that it should not be the Commissioners' highest priority at this time. Commissioner Johnson suggested staff be directed to look at the issues he mentioned above, with a completely open timeline to report back to the Planning Commission. Commissioner Wright asked that staff also consider the service needs of the area. Chair Hayman agreed with those directions, and concurred with Commissioner Johnson that staff should be given a completely open timeline on considering these questions.

Discussion – Main Street Table of Uses Upcoming Amendment Process

Ms. Younger discussed a process and timeline for amending the table of uses for Main Street (Commercial Medium Zones). This process would include further noticing, including mailer notices that would explain why the Council and Commission have decided to move forward with these amendments and include specifics about which uses are possibly changing
and which are remaining the same. The mailers would also include a comprehensive definition
and explanation of "Conditional Use Permit" and how it differs from "Permitted" use, and state
the date of the first public hearing with a note that no decision will be made at the first meeting.
A possible public survey was suggested, but Mr. Snyder expressed concerns about conducting
a public survey if it was not well understood how survey results would be acted upon.

Commissioner Johnson agreed that no survey should be done, as this should be a
legislative decision. Chair Hayman commented that she feels the City Council wants a lot of
transparency with the public and that they do not want to do something that the public is not
comfortable with. She suggested a webpage where the public can comment on specific uses
that they do not want to see changed. Commissioner Daly suggested that a public forum should
also be held before the meeting. Commissioner Helgesen said that no matter what is done,
only a certain group of people will respond. She suggested putting out a paper copy of what is
on the website to reach more people who might not be online, perhaps in the newsletter.
Commissioner Wright agreed with Commissioner Helgesen that a paper copy of what will be
included on the webpage needs to be circulated for those who do not use electronic devices.
She also agrees with Commissioner Johnson that if there is nothing that will be done with
survey results, there is no purpose in doing a survey. Commissioner Hintze voiced that he does
think it is a good idea to do a survey. Chair Hayman said that the more channels to gather
public comment that the Planning Commission provides, the more likely the City Council is to
approve the Table of Uses.

Chair Hayman agreed with all of staff's suggestions on the process checklist included
with the staff report, and also wants information about the proposed changes to the Main Street
Table of Uses to be included in the newsletter. She also would like to see a separate meeting
held for property owners on Main Street. Ms. Younger asked if that would happen before the
open public forum, or after. Chair Hayman and Commissioner Hintze voiced that they feel the
property owner meeting should be done after the public open forum so that they could address
corns the public had raised previously. Commissioner Wright and Commissioner Hirst
suggested doing the meeting for the property owners before the rest of the general public so
that they could feel consulted early in the process.

Commissioner Johnson asked, since this lengthy public process is going to be embarked
upon, if more could be tackled than the Main Street Table of Uses changes. Chair Hayman
says she does not feel the City Council is ready to do more than change the Table of Uses at
this time. Ms. Younger commented that at the property owners' forum some other ideas for Main
Street Changes on the horizon could be discussed to get preliminary feedback from the public
on that as well. Chair Hayman asked staff to remind her to do that.

Chair Hayman directed staff to move forward with the process checklist provided, adding
to that checklist that a paper version of the proposed Main Street Table of Use changes will be
included in the newsletter, and a meeting will be set up with property owners as well. She also
asked that staff develop and present to the Planning Commission a proposed webpage. Mr.
Snyder said that staff can also create a program of publications to show to the Planning
Commission, along with a preliminary schedule, and list of uses that will be included in the
program, and then send it to the City Council for comments before moving forward. He said that
staff will try to get that back to the Planning Commission by the next Planning Commission
meeting.
MINUTES REVIEW AND ACCEPTANCE

The minutes of the May 23rd meeting were reviewed and amendments suggested. Commissioner Wright made a motion to accept as amended. Commissioner Hirst seconded the motion which passed unanimously (7-0).

COMMUNITY DEVELOPMENT DIRECTOR’S REPORT

The next Planning Commission meeting is scheduled for June 27, 2018.

Mr. Snyder discussed recent decisions made in the City Council.

ADJOURNMENT

At 8:52 p.m. Chair Hayman made a motion to adjourn. Commissioner Helgesen seconded the motion which passed unanimously (7-0).

Cheylynn Hayman, Chair

Avalon Comly, Recording Secretary
